Gastón Alejo Delucchi

Full Stack Developer / Backend Developer

La Plata, Buenos Aires, Argentina | gdelucchi@me.com | +54 9 221 607 9500 | linkedin.com/in/gadelucchi | github.com/GADelucchi | gadelucchi.ar

PROFESSIONAL SUMMARY

Full Stack Developer with a strong backend focus, specialized in Node.js, TypeScript, Java, SQL, MongoDB and React. Experienced in designing and implementing REST APIs, scalable architectures and applications that solve concrete business needs, both in freelance projects and in the technical and operational management of my own business. Analytical and problem-solving oriented, able to work autonomously and as part of a team. Looking to join a team that challenges me and to grow into a technical reference role.

EXPERIENCE

Software Engineer — *Freelance* | *August 2022 – Present*

- Design and development of backend and full-stack solutions for multiple clients: REST APIs, authentication/authorization (JWT), relational and non-relational databases.
- Direct client requirements gathering and delivery of tailored solutions, focused on scalable architectures and best practices (Clean Code, SOLID, MVC).
- Key projects: Agisad (SaaS scheduling platform for healthcare professionals), Turnero Dr. Delucchi (appointment system with WhatsApp OTP verification), and MAB Estética (management platform for an aesthetics clinic).

Software Engineer — *Cerratex* | *2024 – 2025*

- Optimized an e-commerce platform for a lock manufacturing company.
- Built a custom checkout flow that automated sales notifications by email, improving lead-handling efficiency.

General Manager & Technical Lead — *iNnovation Store* | *October 2021 – Present*

- Full business management: customer service, stock control, cash management, suppliers and payroll.
- Repair and micro-soldering of Apple devices, including screen remanufacturing.
- Implemented a standardized pre/post-repair checklist, reducing verification time from 7 to 3 minutes per device (~57% reduction).
- Built internal tools (dynamic pricing calculator) and maintain the store website and customer database, responding to maintenance requests within 1 hour.

FEATURED PROJECTS

Agisad — SaaS scheduling platform for healthcare professionals, with availability management, automatic reminders and a multi-professional admin panel. agisad.ar

Turnero Dr. Delucchi — Online appointment system for a psychiatric practice, with WhatsApp OTP verification, private staff panel and automatic reminders. elpsiquiatra.ar

MAB Estética — Management platform for an aesthetics clinic: patient records, appointments, product catalog and admin panel. www.mabestetica.onrender.com

Cerratex — Shopping cart for a lock manufacturer, with orders automatically emailed to the sales team. www.cerratex.com.ar

Dollar Calculator — Internal tool to convert USD prices to local currency, applying spread and interest based on payment method. calculadoraappleserver.onrender.com

TECHNICAL SKILLS

Frontend: React, Vite, HTML5, CSS3, JavaScript, TypeScript, Bootstrap, Sass

Backend: Node.js, TypeScript, Express.js, NestJS, Java, Spring Boot, REST APIs, JWT

Databases: MySQL, MongoDB, TypeORM, Sequelize

Tools: Git, GitHub, Docker, Render, Cloudflare

EDUCATION

Backend Java — Coderhouse | *July 2024 – September 2024*

SQL — Coderhouse | *December 2023 – March 2024*

Backend Node.js — Coderhouse | *March 2023 – August 2023*

JavaScript — Coderhouse | *August 2023 – October 2023*

React — Coderhouse | *2023*

Web Development — Coderhouse | *May 2022 – August 2022*
